Environ Treatments and Skin Care

Environ developed by Prominent Cape Town Plastic surgeon, Dr Des Fernandes, through research into skin health and prevention of skin cancer since the 1980's.

Environ – a beautiful skin for a lifetime using Vitamin A skincare formulations, because of the benefits it offers to sun-damaged, ageing and acne skin types. It has a corrective effect on the skin, soothing, softening and protecting it from the harmful effects of ultraviolet radiation and free radicals. Its most important activity is to normalise the skin, it promotes the production of healthy collagen and elastin and improves the skin's moisture, leading to healthy, younger-looking skin.

The following Environ Facials involve the use of the Ionzyme DF 11 machine which increases penetration of the active products 4400 x more than a manual facial.

Environ Active Vitamin Facial packed with nourishing, anti-ageing ingredients, to introduce vitamin A & C deep into the dermis of the skin leaving it looking radiant and dewy. This scientific approach stimulates Collagen to soften lines and improve elasticity, increase hydration and boost radiance.

3 facial zones	£70.00
5 facial zones	£95.00

Hydra-Boost Facial

The perfect antidote to dry, lacklustre skin, this intensive treatment deeply hydrates while plumping and firming the skin. Based on Hyaluronic Acid, which holds a 1000 times its own weight in water, it helps to reduce fine lines caused by dehydration and increase the plumpness of the dermis, resulting in moisturised, glowing skin.

Hydra-Boost Facial	£95.00

Cool Peels

Help to increase penetration of skin care products into the skin by removing the surface build-up of dead skin cells using mild forms of Lactic acid, to boost hydration and thus refining texture and overall improvement in the way the skin looks and feels.

These new peels remove the excess horny layer and yet maintain the water-proofing barrier qualities of the skin.
